Annual Report 2022-2023

Brief Description about the projects implementing during the year of 2022-2023:

NEED is the Registered voluntary organisation, working for the upliftment of the poor, down trodden community and poorest of the poor, especially for the development of Tribal people in Vizianagaram District, During the year of 2022-2023 NEED has been continuously implementing CCI (Children care India) with the support of Aipe international, Canada, Children Home of Hand In Hand, Germany, in this area we are supporting Children education, providing Micro credit and organizing Anganwadi schools, and we have Running YTC at Salur and Skill development Trainings under the Support of ITDA & TRICOR, Jal Jeevan Mission supported by RWS, Govt of AP, APILIP-II Supported by Water resource department, Govt of AP, Seasonal Hostel, Karrivalasa Supported by Samagra Siksha, Govt of Ap and we have organized Sanitation awareness, Tree plantataion programme in Pachipenta mandals and also we have provided with the support of forest department. These are the main activities during the year of 2022-2023. We are herewith submitting our NEED Details in brief.

CCI (CHILDREN CARE INDIA)

AIPE INTERNATIONAL, CANADA

Children Education project: - Our Project Coordinator working from **Children Care International (CCI) project** since 2003 when it was started in Andhra Pradesh, India. CCI supported to 60 children from 16 villages for their studies that who are totally poor and child labor. Some of them are orphan and semi orphan children. Most of children are belongs to fishing community. Most of children finished their studies and some children dropped out from their studies. Some children got government jobs & private jobs. Some children are in job trail. They are searching for jobs. This year CCI supported to only 5 children for their studies. Some of them are studying in colleges and some of them are preparing for competitive exams at their homes. So, I have visited their colleges and homes and discussed with them regarding their health, education progress and their requirements. They said that they are fine & studying well and also, they wanted tuition fee, traveling expenses, books, stationary and other requirements. So, I have provided their requirements in time that which they needed. And also, I visited all villages once or twice in a month and interacted with their parents and discussed with them about their health and livelihood progress. And I discussed with them about their children's health and education progress. Some parents felt very happy because of their children got jobs. They said they are indebted to CCI.

Details of 3 children

Mr. M.Anand

1. About Maricherla Anand: - He is living Perapuram village, Poosapatirega mandalam, Vizianagaram district, Andhra Pradesh state and India. He has two elder brothers. They got married. He has no mother. His mother left them in their childhood age. Father is innocent. Sometimes he goes to labor work.

Elder brother finished his studies with CCI support. Now he is working as a chemist in chemical factory. 2nd brother is working as a daily labor. Anand finished his engineering course in AVANTHI Engineering College in Bhogapuram. Now he is in job trails.

Ms.S. Leela

2. About Seela Leela: - She is living Visakhapatnam, Andhra Pradesh and India. She has no father. Her father left her mother. Mother is working as a daily labor in grocery shop in Visakhapatnam. Her husband is working as a technician in Electronics shop. Leela is studying 2nd year of M.Sc. (Master of Science) Post-graduation course in Bullayya P.G college in Visakhapatnam.

B. Asha

3. About Bammidi Asha: - She is living in Kopperlla village, Poosapatirega mandalam, Vizianagaram district, Andhra Pradesh and India. She has one sister. She is studying 1st year of intermediate course in Chaitanya College in Vizianagaram. Parents are working as cooks in disable center in Kopperlla village supported by **FRIENDS INDEED PROJECT NETHERLANDS**. They are staying in the center with family. Asha is studying 2nd year of B.Sc. (Bachelor of Science) graduation course in SVSR Degree College in Poosapatirega. This is 3 years course. Recently she got married.

Family financial support project: - We are working with 32 microcredit women in 4 villages. At the beginning CCI supported 14 microcredit women in 4 villages for their businesses that who are totally poor and having school age children. Some of them are single women and they are totally fishing community. This year CCI supported to 17 women each 15,000/- per head to develop their businesses in the month of February'2023. They do different businesses. They should definitely do the business with our support and send their children to school. I visited their villages once or twice in a month and discussed about their businesses progress. And also, I visited their homes one to one and discussed about their health and their children's studies. And also conducted awareness meetings with them and discussed about new loans, personal hygiene, water & sanitation. At present we have 39 microcredit women. Our support is very useful to develop their businesses and also, they get good profits. I discussed with their children about their education progress and given some suggestion to them for their betterment. And I visited some schools that where they are studying and discussed with their teachers about children regularity & progress. And I gather the information of new women that who need our support. I prepare their case studies and monthly reports to send to CCI.

Microcredit women meeting at Mukkam village

Microcredit meeting at Barripeta village

Microcredit meeting at Barripeta village

Microcredit meeting at Barripeta village

Anganwadi project: - This year we opened two anganwadi centers in Ramadasupeta and Ramachandrapeta villages supported by CCI.

We run the Anganwadi center in Ramadasupeta village due to lack of government anganwadi center. There is only 7 children and 4 pregnant women. We run this center at rented home due to lack of permanent shelter in the village. We pay teacher's salary and center rent every month. Daily teacher prepare lunch to children due to there is no cook. Later then she goes to children' homes and take them to the Anganwadi center. After then she teaches lessons, songs and play games to the children. We provided cooking utensils, dinner wares, storage boxes, gas stove, cylinder, table, chairs, uniforms, slates, slate pencils, playing materials and snacks for the children and pregnant women at the center. I visited this center and discussed with teacher about children regularity and requirements for the center. I discussed with their parents about children's health and attendance. I supply all requirements in time whatever they need to

the center. Every month I purchased the snacks from Aditya Gupta Departmental stores in Vizianagaram. Government sanction anganwadi center in this village in February'2023.

We run the additional Anganwadi center in Ramachandrapeta village due to more than 60 children in this village. Government didn't sanction 2nd center in this village even there is more than 60 children. Actually, government runs one center with more than 60 children in a small rented room. It is too difficult to teacher to run the center with more than 60 children. Teacher can't control the children. So, we opened the additional center with more than 30 children in additional rented room. We pay teacher salary, cook salary and center rent every month. Daily cook prepares lunch to the children. Teacher and cook go to children' homes and take them to the Anganwadi center. After then teacher teaches lessons, songs and play games to the children. We provided cooking utensils, dinner wares, storage boxes, gas stove, cylinder, table, chairs, uniforms, slates, slate pencils, playing materials and snacks for the children and pregnant women to both old and additional centers. I visited these centers and discussed with teachers about children regularity and requirements for the both centers. I discussed with their parents about children's health and attendance. And also discussed with pregnant women and antenatal women about their health progress. I supply all requirements in time whatever they need to the both centers. Every month I purchased the snacks from Aditya Gupta Departmental stores in Vizianagaram

NEED-PREM VISWASAM CHILDREN HOME-BOBBILI

Children Education Project - Supported by Hand in Hand, Germany

This Viswasam Children Home project is implementing at Siripurapu Street Bobbili. There are 60 children from 1st standard to Intermediate who are orphans and semi orphans, Most of the children are from poor families of Different communities from various villages of Vizianagaram District of Andhra Pradesh. We provide them free education, shelter, food, uniform, books, stationary, health and other Requirements. Some of the elder children are studying ITI courses and some are intermediate. We conduct health camp once in a month at children home. And also conduct tuition in the morning and evening for all the classes. One of the intermediate girls got prize of appreciation from Junior college for her discipline and regular to the college. And some children participated in cultural programs and won 2 nd Prize for their performance in Bobbili town, and we are very happy that all 10th class children (7 children) secured good marks in public Examinations in 2022-2023. And four of them are joining in intermediate 2 girls Bi.Pc and 2 boys

JAL JEEVAN MISSION (JJM)

The Government of Andhra Pradesh and Department of Water and Sanitation has been sanctioned this Jal Jeevan Mission Project to our NEED organisation for five sub-divisions in vizianagaram and Parvatipuram Manyam Districts of Andhra Pradesh. In this year 2022-23 NEED Organisation implement Jal Jeevan Mission (JJM) in the Districts of Vizianagaram and Parvathipuram Manyam with 5 Sub Divisions i.e Bobbili, Bhogapuram, Parvathipuram, Salur and Kurupam.

Government of India has restructured and subsumed the ongoing National Rural Drinking Water Programme(NRDWP) into Jal Jeevan Mission (JJM) to provide Functional Household Tap Connection (FHTC) to every rural household i.e., HarGharNal Se Jal (HGNSJ) by 2024. The following kinds of works/ schemes are proposed to be taken up under JJM:

- In-village water supply (PWS) infrastructure for tap water connection to every household;
- Reliable drinking water source development/ augmentation of existing sources;
- Transfer of water (multi-village scheme; where quantity & quality issues are there in the local water sources);
- Technological intervention for treatment to make water potable (where water quality is an issue, but quantity is sufficient);
- Retrofitting of completed and ongoing piped water supply schemes to provide FHTC and raise the service level;
- Grey water management Capacity building of various stakeholders and support activities to facilitate the implementation.

About Jal Jeevan Mission

Jal Jeevan Mission, is envisioned to provide safe and adequate drinking water through individual household tap connections by 2024 to all households in rural India. The programme will also implement source sustainability measures as mandatory elements, such as recharge and reuse through grey water management, water conservation, rain water harvesting. The Jal Jeevan Mission will be based on a community approach to water and will include extensive Information, Education and communication as a key component of the mission. The Jal Jeevan Mission will be based on a community approach to water and will include extensive Information, Education and communication as a key component of the mission. JJM looks to create a jan andolan for water, thereby making it everyone's priority.

As a Implementing Support Agency (ISA) We are doing the following activities in Jal Jeevan Mission Programme:

Formation of (GPWSC) – We are forming Grama Panchayat wise Water and Sanitation Committee for Management of JJM Works, Monitoring of the works, Bank account operations and maintenance etc.,

- VAPs Preparation / Streamline
- JJM Books updating at Grama Panchayat Level.
- Houses visits
- water related issues identification
- water related issues/problems resolve with the support of Department.
- Awareness programs including IEC Activities. (Ex., Wallwritings,Posters , Slogans , Hording etc…)
- Organise capacity building programs
- Organise hand wash programs
- Organise street play/Kalajat
- Organise Gram Sabhas at Gram Panchayat Level and Village level.
- Organise Rallies on JJM and IEC Activities.
- Distribution of IEC material
- Identification of FHTCs newly connected
- Opening of Bank accounts
- Mobilisation of User charges/community contribution collected from the community
- Raise the community contributions i.e Donations , CSR fund, Grants, 15th finance commission grants etc.,
- Organise FTKs Testing with five members with the support of Engineering assistant.
- Follow up and monitoring of O&M (Operation and Maintenance) of FHTC and JJM assets.
- VWSC and Bank Account - Book Keeping (Cash Book, Ledger, Vouchers, Bills and other registers)
- Conduct WASH with the support of Government and donor agencies.
- Organise Convergence with Line Departments at Village level and Gram Panchayat Level.
- Organise Manadal / Dist. Conferences with District Officials
- Conduct FTK testings
- Collect samples and send it to the department.

As on today we did the following activities in JJM in our 5 Sub-divisions.

Awareness Programme
on
JAL JEEVAN MISSION

APILIP-II
Andhra Pradesh Irrigation and Livelihood Improvement Project

The NEED Organisation implemented APILIP-II Programme in the Districts of Vizianagaram and Parvathipuram Districts.

NEED-Support organization has accomplished the WUA data collection from the 5 Medium and 71 minor irrigation projects. New staff divided in to 3 Areas and Approached to collect data from Mandal Revenue Officers, D.E's,A.E's, Sachivalam staff and Line Departments.

Department of Irrigation

SO is coordinating with the department of Irrigation facilitating the interventions at ground level which are approved by the DIU and PMU. The department is waiting for the release of budgets and guidelines from the government. The SO is creating awareness to the farmers on department programs Wallslogans, WUA Abstracts, PIM & Microplans

.

4. Support for enhancement of livelihoods.

The support towards enhancement of livelihoods to the target community is planned from the department of Animal Husbandry, Fishery and Agriculture. The PMU has been approved some of the support interventions under each department. To ground those interventions under each department, the project made it mandatory of preparation of micro-plans for each WUA under major irrigation project.

In this connection,NEED-Support Organization has organized orientation meetings with the farmers before conducting the micro-plan exercise. The PRA has been conducted in 35 WUA's on the agreed schedules by the farmers and based on the data collected during the PRA, the SO has prepared 35 Micro-plans as of now.The micro-plans are reflecting the needs and problems pertaining to the services /interventions of the departments of Agriculture, Animal Husbandry and Fisheries.The SO is consulting the departments of Agriculture, Animal Husbandry and Fisheries in connection to facilitate the grounding those interventions to the villages where the micro-plans are approved.

Department of Animal Husbandry

NEED-SO is coordinating with the department of Animal Husbandry towards facilitating the interventions at ground level which are approved by the PMU. The department is waiting for the release of budgets and guidelines from the government. The SO is creating awareness to the farmers on department programs like vaccination to the cattle, Artificial insemination, Goat/Sheep rearing, Backyard poultry, Cattle sheds, Fodder cultivation etc.

Department of Fisheries

SO is closely coordinating with the department of Fisheries in facilitating the interventions at community level which are approved by the PMU. The department is waiting for the release of budgets guidelines from the government. The SO is creating awareness to the members of Fisheries Cooperative Societies on department programs like Fish landing centres, Captive Fish shed nurseries, supply of fish seed in public water bodies, stocking of juvenile Prawn in public water bodies etc.

Department of Agriculture

The government is very keen about promotion of Farmer Producer Organisations (FPOs).Hence the responsibility of forming farmer groups and promotion of FPOs would be looked after by the

department of Agriculture. In this regard, the SO is coordinating with the department towards promotion of FPOs.

Support organization internal review meetings

NEED is used to organize review meeting with the project staff at 15 days intervals. The IDC and Director of the organization would ensure the review meetings to understand the status of the program deliverables and to discuss the project priorities. SO organized 9 review meetings at NEED Central Office Saluru

Programs organized by the SO

Our NEED-Support Organisation has conducted Microplan Activities (PRA,Transacrwalk,WUA Meetings,Focuss Group Disscussions) at the 75 Project WUA's under Minor and Medium Project.

Wallslogans Inserted at Vizianagaram District

NEED-SO conducted Wall slogans paintings at 107 WUA's of Parvathipuram and Vizianagaram ProjectArea

Conclusion

The Support Organization-NEED could accomplish the planned activities at the maximum extent like Awareness **Trainings on** PRA, **Data collected** of Preparation of Microplans of **the** 78Minor and Medium irrigation WUA's in the project area, Wallslogans Inserted in 107 WUA's in the Project Area, **And** the Irrigation department is going to take of modernization of irrigation structure, Completion of collecting WUA and command area farmers data. Submitted staff monthly progress reports and Quarterly Progress Report and Deliverable Bills and Reports on time

Ministry of Women and Child Development

CRECHE CENTERS

The Women & Child welfare department, Govt of AP has sanctioned the 19 Crèche Centers at Pachipenta, Salur and Makkuva Mandals. In the above 19 with 342 Children. The following activities are going on.

Services provided in the Crèche Centers

- Daycare Facilities including Sleeping Facilities.
- Early Stimulation for children below 3 years and Pre-school Education for 3 to 6 years old children.
- Supplementary Nutrition (to be locally sourced)
- Growth Monitoring.
- Health Check-up and Immunization.

TARGET GROUP

The scheme focuses on children of 6 months to 6 years, of working women in rural and urban areas who are employed for a minimum period of 15 days in a month, or six months in a year

NUMBER OF BENEFICIARIES AND FUNCTIONARIES

Ideally the number of children in the crèche should not be more than 25. Of these, at least 40 percent of children should, preferably, be below 3 years of age. It is important that adequate trained worker and helper are available to provide day care facilities and to supervise the functioning of the crèche. In addition to crèche worker, there should be one crèche helper looking after children.

PHYSICAL INFRASTRUCTURE

The crèche located in a safe and secure place which is welcoming and child friendly. It is ideal to have the crèche near the homes of children or near the place of work of the mothers (at a walkable distance i.e. ½ - 1 km) for the following reasons: Mothers breastfeeding their babies can conveniently come to feed their babies.

- Parents can be contacted in case of emergencies
- It is easier to pickup, bring or send the child from home
- If a child is absent for a long period of time, the crèche worker can go herself to
- Enquire about the child from his/her home. As far as possible the crèche environment should be akin to the child's home atmosphere and should also reflect the life style of the community.

Drinking water and Sanitary Facilities

The centre must have safe and regular drinking water facility. For this, centre should install a water filter/purifier which should be cleaned regularly. In places where there is shortage of water, adequate arrangements for storage of water may be done. At least one tank of 300 liters capacity may be installed. Child friendly toilets including for children with special needs should be available keeping in view the safety and security of children at the centre. A clean, Indian type child-friendly toilet with water facilities, soap, clean cloth/towel, garbage bin, wash basin/sink at low level and an exhaust fan should be part of the centre. The water tap should be placed at a height that can be used independently by children. The crèche should have a regular supply of cleaning material such as phenyl, disinfectants, rooms and swabs, dustbins, garbage bins etc. Regular supervision may be done for improving the services and maintaining hygienic conditions in crèche.

BRIEF DESCRIPTION ABOUT THE SKILL DEVELOPMENT TRAINING PROGRAMMES

Supported By: TROCOR & ITDA, Parvatipuram.

Implemented By: NEED (National Environment & Education Development), Non-Government Organisation, Salur, Vizianagaram District, A.P.

Date of Inauguration : 26.10.2022
Date of Completion of the Training Programmes

* Tailoring Training Programme : 28.12.2022
* Four Wheeler Driving Training Programme : 06.12.2022

UNICEF-URBAN WASH PROGRAMME

With the Support of Unicef-SARDS , NEED Organisation is undertaking various initiatives at School/College/Community level in the AIIB supported ULB of SALUR & PARVATHIPURAM in Parvathipuram Manyam District , AP state. Co-ordination with ULB officials on a timely basis plays major role for efficient delivery of the project and effective reach of initiatives. Hence Water And Sanitation Hygiene (WASH) in our SALUR & Parvathipuram ULBs for implementation of WASH programme in 5 Government Schools

Conducted Global Hand Wash Day in Salur & Parvathipuram ULBs,

World Toilet Day programme in Salur & Parvathipuram ULBs

SEASONAL HOSTEL-KARRIVALASA

With the support from Sagra Siksha, Parvathipuram Manyam District, we have opened 1 Seasonal Hostel for Migrant parent's children at Karrivalasa Village, Pachipenta Mandal with Strength of 50 Children.

The main objectives of the programme are to mainstream the children who are neglected by the parents, Migrant families children. Total 48 children were mainstreamed.

వలస కూలీల పిల్లలకు అండగా వసతి గృహం

ZBNF
ZERO BUDGET NATURAL FARMING PROGRAMME

1. Background

Andhra Pradesh is a major agriculture hub in India. Agriculture being one of the key economic sectors, it plays an important role in the livelihoods of people by employing nearly 62% of population in agriculture and allied activities. Agriculture contributes to 28% of state GSDP. Andhra Pradesh is also known as Rice Bowl of India and has a diversified cropping system – covering 80 lakh hectares of land in cropped area. Andhra Pradesh is India's largest producer of fruits, eggs and aquaculture products. About 14 lakh hectares are under Horticulture. The main challenges in Agriculture and Food sector can be described as follows:

Farmer Distress

Farmers are in deep distress. The conventional agriculture practice induces the farmer to rely heavily on chemical fertilizers and pesticides leading to high cost of cultivation. Prolonged dry spells and drying of bore wells coupled with extreme droughts are leading to crop failures. Unseasonal rains and more frequent cyclones are another cause of concern. There are serious problems associated with the livelihoods of landless agriculture workers and tenants. All these factors are leading to distress migration to urban areas. On top of these, market uncertainties are adding to the farmers problems and pushing them into perpetual cycle of debt.

Consumer food crisis

By 2050, the global population is expected to reach 9.5 billion. Our food supplies are likely to be under far greater stress. Adding to this, the availability of arable land is shrinking rapidly due to urbanization, soil degradation and climate change. As a result, large populations may face food scarcity. The existing practices of chemical agriculture is leaving chemical residues in the food and is reducing nutrient value thereby creating health hazards.

Soil degradation

The use of chemicals in agriculture reduces life in the soil and essentially puts plant health at risk. The chemical agriculture practices also contaminate groundwater and other water-dependent ecosystems, leading to biodiversity loss in the farmland. Prevailing agricultural practices such as mono-cropping decrease soil moisture content, causing tremendous stress on water resources. Soil degradation and loss of top soil is resulting in weaker plants. Soils are losing water holding capacity due to reduced tree cover.

Global warming

Temperature analysis conducted between 1900 to 2018 by Berkeley Earth revealed that Temperature increases are happening at an alarming rate around the world. If this trend continues, the world will soon become warmer by 2^0C.

The programme has been organizing mega training events delivered by Professions from the Department. So far, eight training events have been organized in our Vizianagaram District to about 1800 best-practicing farmers directly. These trainings add a huge impact on farmers in building their motivation and commitment levels to improve their own farming methods and also to take this programme to other farmers.

Benefits

ZBNF provides substantial economic benefits to farmers. Most important of them are: Reduced CostInterest SavingsHigher Yields Intercrop ValueFairer Returns

COVID – 19
RELIEF ACTIVITIES.

In response to the rising severity and impact of the Coronavirus outbreak, NEED organisation has initiated impactful activities aimed at providing safety and relief to individuals and communities.

NEED is collaborating with the Government to prepare and distribute nutritious meals to all front line professionals covering doctors, nurses, government officials, policemen, etc. who are relentlessly serving the nation to combat this crisis.

Additionally, Ration kits will be distributed to daily wage earners, who are unable to sustain normal life on account of the current situation.

Health Safety equipment and supplies will be distributed to medical and paramedical professionals in nominated hospitals to ensure their safety and to prevent further transmission of infections.
The Animal Care team will also provide food to stray animals during this crisis.
During these times, we pray for the safety and recovery of all, and may we undertake all precautions necessary to ensure the health and well-being of ourselves and our loved ones.

Block Level Sports Meet

Supported By: NEHRU YUVAKENDRA, VIZIANAGARAM
